

FILE 4 – LOOPS & ARRAYS EXERCISES

Loops and One-Dimensional Arrays

Exercise 1 Input an array of integers and calculate the sum of its elements.

Exercise 2 Input an array of integers and find the largest value.

Exercise 3 Input an array and a number x. Count how many times x appears in the array.

Exercise 4 Find the first positive element in an array. If none exists, print "None".

Exercise 5 Reverse an array in-place without using a second array.
